PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	This article is of good quality from the point of view of the writing as the experimentation procedure and the analytical techniques used. However, there are things that need to be corrected to improve the readability and even the quality of discussion of the results. In addition, bibliographic research seems insufficient for an article of this value. I recommend that authors enrich this section of the article with more new bibliographic references. The authors must take into account my remarks, observations, suggestions and recommendations to further improve the quality of this article which is of indisputable value and a relevant contribution to phytomedicine. In this way, the publication of this article will be possible
