In this work, the researchers investigated the purification of <math>\beta</math>-Glucosidase, one of the flavor-enhancing food enzymes, from Peppermint. The manuscript is well-written, and the results presented here may be useful in several fields, such as biotechnology and food industry. I have only minor comments:</p> <ul style="list-style-type: none"><li>- Indicate if standard deviations or confidence intervals are used in the plots.</li><li>- Replot the figures 5 and 6 with the y-axis being at the left of the plot (rescale it from the minimum x-axis value to the maximum).</li><li>- Conclusion has to be modified as it includes introductory information (the first paragraph), which should have been in the introduction section.
