

## Review Form 1.6

Journal Name:	<a href="#">Asian Journal of Research in Biochemistry</a>
Manuscript Number:	Ms_AJRB_91503
Title of the Manuscript:	In vitro antiplasmodial and hemolytic activities of <i>Trema orientalis</i> , <i>Cnestis ferruginea</i> and <i>Dialium dinklagei</i> used to treat malaria in Côte d'Ivoire
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://journalajrb.com/index.php/AJRB/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	This manuscript provides new information about the use of <i>Trema orientalis</i> , <i>Cnestis ferruginea</i> and <i>Dialium dinklagei</i> used to treat malaria. However, there are some things that need to be improved: <ul style="list-style-type: none"><li>- The consistency in writing the scientific name of the plant is needed</li><li>- There is no the research purpose statement in introduction section</li><li>- Please re-write the abstract, so it does not repeat the sentences appeared in the manuscript body (e.g. introduction, results)</li><li>- Please provide the authentication number of the plant used in this research</li><li>- Statistical analysis is needed in order to display the data</li><li>- There are no data on phytochemical screening or quantification of the plant extracts used in this research</li></ul>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i> Yes. This research used blood samples that were collected from patients older than 18 years. However, the protocol of this study had been approved by the National Ethical Committee for Research.
