### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	Very fascinating and timely topic. I congratulate the authors on a job well done! I believe since the paper is short, I recommend that the authors add new section and it could be called Example or Case study. I recommend that the authors describe the theory first, later walk us through with the example to follow.	
<b>Minor</b> REVISION comments	There are some times where the authors start sprinkling new ideas and theories in the conclusion but they never mentioned them in the actual paper. For example, Fuzzy Logic and there are few more. If you like to keep those terminologies in the conclusion, maybe you need to add a paragraph or two talking about them in your literature review section.	
<b>Optional/General</b> comments	Reflect back at your audience and write your paper that your audience will understand.	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
