|-------------------------------------|---|---|
| Compulsory REVISION comments | <ol style="list-style-type: none">1. Write down the objective of the study clearly under a separate heading2. Insert reference for the experimental design3. How the sample size was calculated4. Ideally there should have been 7 groups, 7th being the group for determination of baseline haematological parameters in the rats before intervention. Why this was not considered, needs justification5. Results have been overexpressed5. What are practical implications of significant alteration in neutrophil count? Secondly, this could have been a species specific finding; other studies have shown increase in neutrophils? Kindly comment on this in the discussion, giving the reference.6. Some Fresh references especially from 2022 do not support the findings of this study. Kindly have a look at them | |
| Minor REVISION comments | Spelling grammatical mistakes have been noted in almost all the section , need correction | |
