

SDI EDITORIAL COMMENTS FORM

EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>Genus name should be in italics in all text and tables</p> <p>- In materials and methods authors should clarify how they managed to collect only adults' female mosquitoes</p> <p>-Statistical analysis: a)Why the dataset was pooled together and not analyzed separately? Specify b) I recommend a statistical comparison between boxes in order to have a more elaborate results and discussion explaining the outcomes.</p> <p>-Numbers in Tables corresponds to percentages? Clarify in table captures</p> <p>- Tables 1-3 could be joint together. Table 4 is a summary of previous tables. In addition numbers should be checked as Anopheles is depicted with 72 in Table 4 block A, but in table 1 as 71.</p>	<p>All the issues raised addressed. The tables should be published as presented for clarity and easy comprehension of the research findings.</p>
