

Editor's Comment:

The authors in response to the reviewers' suggestions and Editor refer to : "Corrections has been carried out.", but when comparing the first version of the article and the last one after corrections, I find only the following changes:

Title: the word "Nigeria" was removed

Summary: changed: "Five objectives, five research questions and five hypotheses guided the study. " Two objectives, two research questions and two hypotheses guided the study."

Changed: "RESULTS AND DISCUSSION OF FINDINGS" to "RESULTS AND DISCUSSION"

In this sense and taking into account the suggestions that reviewers and editors have made and that I cannot identify in the latest version of the article, I would like the authors to submit detailed report with the color identification different from the changes they refer to having made.
