PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	Interesting study. The study is a cross sectional descriptive study , there is no prospective component as mention in methodology section. When was this study carried out, it was mentioned as 2021 in methodology section and 2020 in results section. Investigator has mentioned trade names and names of some countries in relation to equipments. It is much better if the investigator study other risk factors including behavioural risk factors which have influence on both diabetes mellitus, dyslipidaemia and CKD though it is outside the objective.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
