Manuscript Number:	Ms_AJRRU_92324
Title of the Manuscript:	Prevalence of urinary incontinence and possible associated etiological risk factors in saudi women.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journalajrru.com/index.php/AJRRU/editorial-policy>

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none">- Most authors refer to statistically significant as $P < 0.05$ and statistically highly significant as $P < 0.001$, but this article p value 0.0001 is not common. In the method : 95 percent confidence interval (inconsistency).- the conclusion in abstract does not refer to the expected research objectives and differ with conclusion in the text, and usually the conclusion is no longer referring to journals- keywords are generally 3-5 words, but here are written more than general keywords in some journals- I found that there was a mismatch between the number of subjects/participants in the method mentioned as 270, but the results (table 1) were written as n=250 participants	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
