

Review Form 1.6

Journal Name:	Asian Plant Research Journal
Manuscript Number:	Ms_APRJ_90601
Title of the Manuscript:	Effect of Industrial Coconut Oil Effluent Irrigation on Germination, Growth and Yield of <i>Talinum fruticosum</i> L.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalapri.com/index.php/APRJ/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>The work is very good! But it is very similar other produced in the same area on other species.</p> <p>So, according results of both studies I say: <i>Results of this work corroborate those performed with the same effluent on Corchorus olitorius (Kwaya et al.. 2021). The Coconut oil Effluent not appears appropriated to stimulate growing of two cultivated species of different families and different requirements. You'll see.....Perhaps you could find some other way or better treatment or manage of coconut waste water to reuse the coconut oil effluent, which appears as the principal or most important objective.</i></p> <p>Other commentaries and suggestions are on the Ms_APRJ_90601 attached.</p>	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
