General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalarjgo.com/index.php/ARJGO/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. In the discussion chapter, to add from the research results, an analysis of the discussion is carried out one by one (can be compared with the results of previous studies, existing theories) looking for gaps then a complete and detailed discussion is carried out.2. It is necessary to apply for ethical clearance to the ethics commission so that there is evidence that the research conducted does not violate ethics to protect the subject .	
Minor REVISION comments	In the discussion or discussion section, it is necessary to explain one by one the results of the research obtained	
Optional/General comments	In general it's good but needs an ethical test	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p> <p>Yes, it is suspected that there is an ethical problem so there is a need for evidence that the research conducted does not violate ethics to protect the subject and avoid conflicts of interest, namely by writing down the ethical pass certificate number that has been issued by the relevant agency.</p>
