

Review Form 1.6

Journal Name:	Asian Research Journal of Mathematics
Manuscript Number:	Ms_ARJOM_91322
Title of the Manuscript:	GENERAL PARAMETERS ESTIMATION IN THE PRESENCE OF NONRESPONSE USING DIFFERENCE-CUM EXPONENTIAL ESTIMATORS
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalarjom.com/index.php/ARJOM/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The originality of the paper needs to be further clarified. Thus, the literature survey should be extended to 2022, and the reference numbers of the newly pertinent journal papers need to be more clearly introduced, one by one. Moreover, you are requested to discuss how your approach differs from the cited references, then, reinforce your article's innovation, and to revise the Introduction and Conclusion of the article	
Minor REVISION comments	The following studies can be included in the article to strengthen the article (if possible) Yadav, S. K., & Zaman, T. (2021). Use of some conventional and non-conventional parameters for improving the efficiency of ratio-type estimators. <i>Journal of Statistics and Management Systems</i> , 24(5), 1077-1100. Zaman, T., & Kadilar, C. (2021). New class of exponential estimators for finite population mean in two-phase sampling. <i>Communications in Statistics-Theory and Methods</i> , 50(4), 874-889. Zaman, T. (2021). An efficient exponential estimator of the mean under stratified random sampling. <i>Mathematical Population Studies</i> , 28(2), 104-121. Zaman, T., & Kadilar, C. (2019). Novel family of exponential estimators using information of auxiliary attribute. <i>Journal of Statistics and Management Systems</i> , 22(8), 1499-1509. Zaman, T. (2020). Generalized exponential estimators for the finite population mean. <i>Statistics in Transition new series</i> , 21(1), 159-168. Zaman, T., & Dunder, E. (2020). Proposing Novel Modified Ratio Estimators by Adding an Exponential Parameter. <i>Lobachevskii Journal of Mathematics</i> , 41(3), 451-458.	
Optional/General comments	The related article is theoretically powerful. The proofs are presented clearly. It can be made more effective with the fixes mentioned above.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	

Reviewer Details:

Name:	Tolga Zaman
Department, University & Country	Cankiri Karatekin University, Turkey
