

Review Form 1.6

Password- Jfeiofjewf(9k)nkdfdPP

Journal Name:	Asian Research Journal of Mathematics
Manuscript Number:	Ms_ARJOM_92821
Title of the Manuscript:	Exact solutions of the linear fractional diffusion and diffusion-convection equations via the Regular Perturbation Method (RPM)
Type of the Article	Paper in Applied Mathematics

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalarjom.com/index.php/ARJOM/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1-The title of the paper (Exact solutions of the linear fractional diffusion and diffusion-convection equations), It is inaccurate because it is not necessary that this type of problem accept Always an exact solution. Indeed, there are many problems that accept approximate solutions.</p> <p>Therefore, it is better to remove the word exact from the paper title.</p> <p>2- The two relations mentioned at the end of page 3 are not clear and they need an explanation of how to obtain them.</p> <p>3- The researcher has chosen two applications that have exact solutions. It would be preferable if the method was applied to a problem that has an approximate solution, and then compared the solution with other methods such as those mentioned in the introduction.</p>	
Minor REVISION comments	<p>The author did not mention the references from which one to five definitions were taken. It is preferable to assign these definitions to their sources, because they do not belong to the author.</p> <p>In general, all references are not mentioned in the text of the article, which is not acceptable in scientific articles.</p>	
Optional/General comments
