

Review Form 1.6

Journal Name:	Asian Research Journal of Mathematics
Manuscript Number:	Ms_ARJOM_92821
Title of the Manuscript:	Exact solutions of the linear fractional diffusion and diffusion-convection equations via the Regular Perturbation Method (RPM)
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalarjom.com/index.php/ARJOM/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>This paper is devoted to present, implement Regular perturbation Method (RPM) for the Solving fractional diffusion and diffusion-convection equations, in order to determine the exact analytical solutions of some linear fractional diffusion and linear fractional diffusion-convection equations.</p> <p>The paper is well-organized in mathematical sense and this property gives it acceptable for publishing.</p> <p>However i should mention some remarks to improve the current form of paper.</p>	
Minor REVISION comments	<ol style="list-style-type: none"> 1) The title of paper should be changed. I recommend it begins by "The Exact solutions of the linear fractional diffusion and diffusion-convection equations via the Regular perturbation Method (RPM)". 2) In the end of Eq. (Definition 2), a semicolon sorter is required. 3) In Page 2, The boundaries of the symbol α must be clarified. 4) In Page 3, Subsection 2.2, should be replaced $0 < \alpha < 1$ by $0 < \epsilon < 1$. 5) In Page 6, Subsection 3.1, the boundaries of the symbol ϵ must be clarified. 6) Please check the English usage of paper carefully and also any insignificant mistakes which are inevitable in the paper. <p>After doing the above comments, i will be sure that the modified paper can be very interesting and beneficial for readers. Therefore i strongly suggest to publish the modified version of paper.</p>	
Optional/General comments
