PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none">• The title is interesting and can be done more about the chemical compositions of the honey for each species in the future. However, for a time it is necessary to take the appropriate software for the analysis like SAS or R.• Put the p-value interims of $p < 0.05$ for significant and $p > 0.05$ to the non-significant parts in the abstract and in the text.• Mean separation in the table for the yield parameter is mandatory so incorporated it.• Take the journal referencing systems, properly punctuations and spacing.• Recent referencing is appreciable.	
Minor REVISION comments	Add list of Authors below the title Add:- Data availability statement after the conclusion	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
