PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Technical components of the manuscript, viz. the grammar and sentence structure, need major revision. Some sentences are very long (e.g. 10 lines) which makes no sense as well as what the author(s) trying to convey becomes jumbled up. There is repeated usage of "we" in the manuscript, which should be rephrased to other pronoun: reason- this manuscript is not a product of ethnographic work, it is a scientific paper and thus any reference to first person should be omitted. The conclusion section is abrupt. It makes no sense. It does not give any conclusive information or anything. Revise and re-write the conclusion.	
Minor REVISION comments	There are minor mistakes in species names and the spellings, e.g. Apis, not Aphis (page 5) and other mistakes like "earwax" in page 5. Bees don't produce earwax. Please check it thoroughly.	
Optional/General comments	Check in-text citations/parenthesis.	

PART 2:
