

Editor's Comment:

Reviewed manuscript (2022/UPJOZ/1734) entitled, "**Sexual maturity scale of the swimming crab *Callinectes pallidus* (Rochebrune, 1883) from Lake Nokoué in South Benin, West Africa**" to me for a final decision. I have gone through this interesting paper and found that the authors have followed the majority of the scholastic comments/suggestions raised by the reviewers as well as substantially improved their manuscript but there are still some minor mistakes/errors in language and formats including texts, citations, tables, figures and references that need to be done according to the guidelines of the journal. Therefore, I recommend the manuscript for publication in [Annual Research & Review in Biology](#) with minor revisions.
