

Editor's Comment:

Title: 'Laboratory Evaluation of the Insecticidal Toxins from Entomopathogenic Nematode Symbiotic Bacteria to Control Vegetable Diseases and Pests' is a good piece of research work. I have read thoroughly the original and revised manuscript and found sufficient improvement of the manuscript based on reviewers' comments and suggestion.

But there are some issues need to be checked.

1. For example, Reference no. 1 is based on rice blast disease but in citation (introduction) it seems related to insect pest need to be checked and corrected.
2. In reference 3, writing authors name abbreviation is not correct. Please check original article.
3. Other minor correction I have marked by track change mode in reference chapter of revised manuscript.

Decision: My editorial decision on this manuscript is accept.
