

Review Form 1.6

Journal Name:	Current Journal of Applied Science and Technology
Manuscript Number:	Ms_CJAST_91910
Title of the Manuscript:	Effect of tray drying conditions on the bioactive compound of the papaya leaves
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalcjast.com/index.php/CJAST/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>A recommendation sentence should be written at the end of the summary section. Information about statistically significant results should be given in the summary section. The English of the article should be corrected.</p> <p>In the introduction part; Literature should be increased in the introduction part. "Evaluating of Microwave Drying for Hawthorn Slice as Alternative to Convective Drying" This resource is available. The aim of the study should be written in detail in the last part of the introduction.</p> <p>In the material and method part; how many papaya plants were taken? should be written. Reference should be made to chemical analyzes performed on the papaya plant. "Evaluating of Microwave Drying for Hawthorn Slice as Alternative to Convective Drying" This resource is available. The operating parameters of the ICP-OES should be given. Statistical analysis of the results should be done. Which statistical analysis was done and its confidence interval should be given. how long the samples were dried and the final moisture content of the samples should be given in detail. If possible, it can be put figure of the dryer. "Blanching Treatment", "Initial Moisture Content", "Drying Characteristics of Papaya Leaves" These applications should be given in detail in the material and method. Drying can be modeled if possible. The literature should be increased in the results and discussion section.</p>	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
