

Review Form 1.6

Journal Name:	European Journal of Medicinal Plants
Manuscript Number:	Ms_EJMP_91891
Title of the Manuscript:	Cannabidiol, the journey of Cannabis from a social stigma to a miracle drug in Dentistry.
Type of the Article	Minireview Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalejmp.com/index.php/EJMP/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1) There are some minor language and editing issues. I would recommend a professional editing service. 2) This is a very interesting and relevant topic, and I think the authors could explore it better. I also suggest a paragraph stating the main disadvantages or limitations of using Cannabidiol in Dentistry. 3) How many papers were included in the final review? Were there any exclusion criteria? I think the authors should include this information in the "Procedure" section. 4) Some phrases do not have any references attached, for example: "Another study was conducted on rat models, wherein artificially induced periodontal lesion were treated with cannabidiol mixed in a saline vehicle." – The authors should mention which study did this, and also explore what were its main findings. 5) This review has potential, but the authors should add more information regarding the papers they reviewed. It is too superficial in its current state.	
Minor REVISION comments	1) Some keywords are not indexed in the MeSH terms. 2) The references list needs to be standardized.	
Optional/General comments	According to the authors, this manuscript aimed to "focus on the therapeutic potential of Cannabidiol and the impact this may have on dentistry with the supplemental vision of encouraging further studies to reveal any other beneficial properties that may be present". There is merit to this paper, however, I think some revisions should be performed in order to level it up to the quality and standards of this Journal.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
