PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1 The topic is good and well attempted.2 Well written with few grammatical mistakes.3 But the toxicity part only based on organ weight with no gross or histopathological evidences is not convincing. Moreover no control group only with the extract to suggest its possible role in toxicity. It has to be followed as per OIE standard protocol to claim for it.4 The author strongly suggests that the phenolic compounds mediated the effect in the study. But there is no study suggesting its claim.5 Current treatment modalities not discussed.6 Ethical committee reference number.7 No figures on the physical appearance of the extract and the material used.8 Reference needs to be modified as per the standard format of the Journal.	
Minor REVISION comments
