

**Editor's Comment:**

After review of comments given by respective reviewers and further revisions by author, I recommend this below cited manuscript to be accepted for publication with some following minor additions/modification.

1. The source of patient's genital area photo must be cited below respective image.
2. The methodology of data collection and analysis must be highlighted.
3. The References must be in sync with journal publishing guidelines.

With incorporation of above inputs, may publishing work be initiated.
