PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The article makes a positive impression, it is written on an actual issue for the region. The author presented a very large amount of data in the tables and graphs. It would be appropriate to indicate which strains of microorganisms were used as bioinoculants since they are specific for different plant species. Image 1 has no caption.	
Minor REVISION comments	There are some technical errors. The conclusions are given after the main text of the article, as well as in the additions between Figure 3 and Table 5. In photo 2 in the "Experimental view" part, it is impossible to read the inscription. Is it needed there?	
Optional/General comments	It may be appropriate to arrange the text and tables in a different way to avoid large spaces between the text and table breaks.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
