

**Editor's Comment:**

Referring to Manuscript Title: Effect of exogenous application of auxin on leaf cuttings of Mexican Snow Ball (*Echeveria elegans* Rose),

I checked the attachments carefully and I think that the author should revise the manuscript as mentioned by **Dr. F. Talat**

The author didn't follow the comments precisely, so there are still minor revisions needed. Also the author should mark the edited parts in the text as mentioned by all reviewers.

**Editor's Details:**

Dr. Samah Mohamed Bassem Khalil  
Associate Professor, National Research Centre (NRC), Egypt.
