Manuscript Number:	Ms_IJECC_91137
Title of the Manuscript:	Effect of exogenous application of auxin on leaf cuttings of Mexican Snow Ball (<i>Echeveria elegans</i> Rose)
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijecc.com/index.php/IJECC/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In the results and discussion, it would be good to include what others have done, unless it is a totally new research work and no such work has been done previously. But it would be good to know the strides made in this field. In the table, indicate whether the results are significantly different	
Minor REVISION comments	The areas highlighted yellow need clarification, or rephrasing or editing. There is a lot of use of Maximum and minimum in results. This should actually be highest/increased most and lowest/least... Max and Min makes reader interpret that there is a particular max or min	
Optional/General comments	It is a good paper, and the study area current and relevant. However, more info on hormone use in the intro instead of only introducing the plant would improve the knowledge.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
