PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The research regarding this type of problems in the good growth of sorghum, a very important food in various regions of India, must be analyzed in great detail for decision making in its implementation of the crop. The important thing that is emphasized is the use of statistical elements that help to carry out said evaluations, as is also shown in very similar developments in the following electronic references https://www.researchgate.net/publication/267797246 Morpho-physiological Criteria for Drought Tolerance in Sorghum Sorghum bicolor at Seedling and Post-anthesis Stages https://apply.jar.punjab.gov.pk/upload/1640596790_145_1_JAR_1737.pdf	
Minor REVISION comments	It's a good job, it only needs to be revised in some formatting parts, since the words are spaceless but maybe it is due to the version of the word processor.	
Optional/General comments
