

Editor's Comment:

We've read the original research article (manuscript)

Performance of Planters Under Different Tillage Practices on Growth, Yield, Energy Use Efficiency and Economics of Rabi Maize

- I ask the author to review the **green marks to correct** some grammar and table heading endings in table 3 and 4 **green point** .
- The **red ribbons** coordinate the beginning of paragraphs.

I also noticed that the authors have added some words that may deviate from the text of the journal, after I reviewed the writing policy and also the latest research published in a journal to verify the truth of what they wrote.

1. So please check it is shaded in blue "**4. CONCLUSION AND RECOMMENDATIONS**".
2. In the end, I ask the authors to follow the publishing policy in writing the research, based on the template for writing **keywords**, the participation of the authors in writing the research "**AUTHORS CONTRIBUTIONS**" , **the interest of conflict**" **COMPETING INTERESTS**" **ACKNOWLEDGEMENTS** if applicable, and finally, **Since the authors did not use ethical consent** "**ETHICAL APPROVAL**" , **and as stated in the publishing template SDI template mark on use only, it is best to remove it.**

The research is accepted for publication, after amending the content in the research paper according to the journal's publication policy "SDI template".
