

Editor's Comment:

The revised manuscript has not addressed all the comments and suggestions provided by the three reviewers. There are still many flaws in it. Therefore, the present version is not ready to be accepted for publication. Authors should modify and improve the original manuscript according to the previous reviewers along with the following suggestions:

1. Add "India" to the paper title.
2. Avoid using abbreviations and duplicated words (same as the paper title) in choosing the keywords.
3. All acronym names must be defined when first appear, such as AR, MR, ACF, PACF.
4. Figures 2 and 3 have not been referred to in the text. Besides, all figures and tables must be referred in the text. Otherwise, they are not necessary to be included in the text.
5. What is "(R2021a)" in MATLAB citation? Please explain.
6. Please unify the use of "Figure", "fig.", "figure".
7. Again, unify the use of the font for p, d and q.
8. Many capitalization errors have been detected.
9. The last sentence in the conclusion is contradictive to the rest of the result findings and descriptive in the text.
10. More emphases are needed on the practicality of this study, especially in the conclusion remarks.
11. Accurate checking is absolutely necessary to ensure cited references be listed and uncited references be deleted in the list.

A thorough proof-check and English check is highly recommended.
