

Editor's Comment:

I have read the paper entitled "**Simulation of the water demand in 2050 in the Lobo watershed in Nibéhibé (Central-Western Ivory Coast): Application of the WEAP model**" written by TOURE Fanraban Fabrice, Konan-Waidhet Arthur Brice, KOUA Tanoh Jean Jacques, YAO Affoue Berthe et DIARRA Ali. This is an interesting paper in accordance with the next global situation "water scarcity". so i support to be published at International Journal of Environment and Climate Change.
