

Editor's Comment:

The authors provide data on the effect of different irrigation regimes on pod yield, water requirement & productivity and economics of groundnut varieties under Southern Telangana Zone. On the basis of the reviewers' reports (appended), the paper should be acceptable for publication in the International Journal of Environment and Climate Change as the authors did some modifications cited by the reviewers. In rewriting the paper, the authors should take special care to address the important comments below from the editor.

General comments

- The topic must be slightly edited, please check the corrected manuscript.
- Any interesting data (tables, figures or photos) to make the paper more realistic.
- The paper needs English grammar editing before publishing.
