

Editor's Comment:

I have reviewed the revised manuscript and reviewer comments for the editorial decision of the manuscript titled "**Agricultural Weeder With Nail Assembly**" for **Weed Control, Soil Moisture Conservation, Soil Aeration and Increasing Crop Productivity**". I came to the result that the authors have incorporated a few suggestions recommended by the reviewer only. Most of the recommendations are not considered in the revised manuscript. Without those, there are many flaws in the revised manuscript. I think the revised version still needs overhauling in light of the reviewer's comments. I have also highlighted several mistakes and added comments in the revised manuscript (pdf file attached). Also, tables and figures are not according to a journal style which needs to be in the line of journal format. I recommend the second revision of this manuscript for improving its quality.
