

Review Form 1.6

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_92279
Title of the Manuscript:	Management of postharvest anthracnose disease of papaya (<i>Carica papaya</i>) using antagonistic microorganisms
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijecc.com/index.php/IJECC/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Major REVISION comments	<p>The manuscript has a lot of missing spaces errors, the author needs to be carefully considered, for example, of <i>in vitro</i> evaluation, exact of <i>in vitro</i> evaluation; <i>amyloliquifaciens</i>UHSB-BCA-16, exact <i>amyloliquifaciens</i> UHSB-BCA-16; <i>under in vitro and in vivo</i>, exact <i>in vitro</i> and <i>in vivo</i>; effective. <i>In vivo</i>, exact effective. <i>In vivo</i>; UHSB-BCA-15to, exact UHSB-BCA-15 to; agent <i>Bacillus</i>, exact agent <i>Bacillus</i>; UHSB-BCA-15at, exact UHSB-BCA-15 at; with50.00%, exact with 50.00%; ishightly, exact is highly; diseasesduring, exact diseases during; Abeywickrama <i>et al.</i>, exact Abeywickrama <i>et al.</i>; Ademeet <i>et al.</i>, exact Ademeet <i>et al.</i>; spores(Rana, exact spores (Rana; methodslake, exact methods like; Cota <i>et al.</i>,2008, exact Cota <i>et al.</i>, 2008; <i>in vitro</i>conditionby, exact <i>in vitro</i> condition by; wereisolated, exact were isolated; fruitscollected, exact fruits collected; <i>gloeosporoides</i>produced, exact <i>gloeosporoides</i> produced; effectiveisolatesofbiocontrol, exact effective isolates of biocontrol; etc.</p> <p>The manuscript's keywords need to be added. Remove content collection of biocontrol agents. In material and methods, the author needs to rewrite to focus on the main content, rearranging the ideas for more logic. Information on the source of the biocontrol agents isolates should be presented in tabular form. Remove content collection of biocontrol agents. There are 2 similar content "<i>In vivo</i> screening of microbial agents against <i>C. gloeosporioides</i> and <i>In vivo</i> screening of antagonistic microbial agents against <i>C. gloeosporioides</i>". Screening of antagonistic microbial agents against challenge inoculation of post harvest anthracnose disease pathogen (<i>C. gloeosporioides</i>) on papaya fruits under <i>in vivo</i>. The author should rewrite it as follows: Preparation of <i>C. gloeosporioides</i> inoculum, preparation of liquid spraying of microbial agents, then conduct experiments on papaya fruits under <i>in vitro</i> conditions. The sample source shown in the material and methods and results are not the same. Isolation and <i>in vitro</i> evaluation of microbial agents against <i>Colletotrichum gloeosporioides</i>. The author needs to recheck the microbial agents' numbers. T1 - BCA1 (isolate no. 22) not mentioned in Table 1 should be replaced with <i>Trichoderma harzianum</i> UHSF-15. In references, is the title of the journal italicized and abbreviated?, The author needs to present consistently (for example, reference no 13). There are some references that are not in the manuscript such as Jayalakshmi; AOAC; Kim, P. and Chung, K., 2004; etc. The author needs to add to the manuscript.</p>	
Optional/General comments
