

Editor's Comment:

The revised manuscript needs moderate to revisions again prior to be accepted for publication:

1. Duplicated keywords (same as in the paper title) must be re-chosen.
2. All abbreviations and acronym names must be defined when first appear, such as "Pred.", "Adj.", "Cov", to name just a few.
3. Specific objective of this study must be included in the last paragraph of the introduction section.
4. "Plate" may be integrated with "Figure", not separately.
5. Plate 1 has not been referred to in the text.
6. Appendices have been mentioned in the text, but unfortunately they cannot be found.
7. The conclusion section is too brief and just summarizes some of the study results. More emphases are needed to include all the significant result findings, practical implications as well as contributions from this study. These information should be mentioned in the abstract also.
8. There are many spacing errors. As such, a thorough proof-check and English check is highly recommended.
