

## Review Form 1.6

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_93245
Title of the Manuscript:	The Effects of Spray Drying Conditions on Moisture Content, Water activity, Bulk Density and Tapped Density of Rice Milk Powder
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijecc.com/index.php/IJECC/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The completed study is indeed a purely scientific article. However, in my opinion, the work is not completed. In particular, it is not explained why exactly the milk consumption and drying temperatures indicated in the article were chosen. This needs to be added to the article.	
<b>Minor</b> REVISION comments	When correcting the material of the article, it should be taken into account that many authors, as follows from the sources cited, dealt with similar issues. In this regard, it is necessary to approach the issue of changing the article very carefully.	
<b>Optional/General</b> comments	When correcting the material of the article, it is necessary to change the cited literary sources. The references given, in my opinion, must be numbered all the sources and removed from them the literature that was published before 2000.	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
