

## Review Form 1.6

Journal Name:	<a href="#">International Journal of Pathogen Research</a>
Manuscript Number:	Ms_IJPR_90510
Title of the Manuscript:	Malaria Parasitemia and Anemia Among Pregnant Women Attending General Hospital, Enugwu-Ukwu, Southeastern Nigeria
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijpr.com/index.php/IJPR/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	A much more detailed statistical study is mandatory to be made! Which are the meanings of $X^2_{tab} = 9.488 > X^2_{cal} = 1.465$ ; d.f = 4.? What statistical function was used to calculate these parameters? The authors do not specify at all the calculating formula for Percentage Prevalence (%) from Table 1 to Table 7! Materials and Methods must be much more detailed! The conclusions are extremely short and insignificant! Only 3 sentences that absolutely do not reproduce the main final obtained results! The Introduction part is too short and not eloquent!	
<b>Minor</b> REVISION comments	The abstract is OK!	
<b>Optional/General</b> comments	I propose to the authors to develop the experimental part of this article, which could be interesting! Make a detailed and serious statistical study, clearly explained!	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
