Type of the Article	Pilot study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijpr.com/index.php/IJPR/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This article has some good concept with regards towards denture hygiene. This should be considered for publication in your journal..	
Minor REVISION comments	1point to consider in material and methods, is that, since the patients were told not to clean their dentures before the experimental procedure the food habit or type of food consumed could also have influenced the microbial count.. although all could not have had the same kind of food, but an alternate approach would be to carry out the procedure after cleaning the denture before experimental procedure	
Optional/General comments	There could be some images included in material and methods used	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
