

Editor's Comment:

Regarding the manuscript entitled: "**Assessment of Genetic Variability, heritability and genetic advance in Soybean (Glysin max L.) genotypes**"

- Title words must begin with either uppercase or lowercase; according to the journal's instructions.
- The sentences of "**Introduction**" need citation (cite where necessary)
- The section "**Materials and Methods**" needs to be described in more detail; particularly the statistical analysis part, where **the author (s) need to describe in detail how to perform the statistical analysis of the data.**
- The author (s) need to standardize the references according to the journal's instructions.

In general, the manuscript needs more revision.
