PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	the study is interesting, with accurate data and recent references. However, I ask for some improvements - keywords after the abstract - does the presentation of the bibliographic references in the text meet the instructions to authors - better specify the geographical coordinates of the experimental station - cite all the parameters analyzed in the methodology - no statistical analysis, major drawback of this work, however, once you spoke of difference and significant effect. what is the test used and at what level 0.001, 0.05? if there was a statistical analysis, add it to the methodology, analysis and software? - specify the meaning of some abbreviations, SS, TSS???	
Optional/General comments
