

Editor's Comment:

I carefully analyzed the review process, the reviewers' recommendations and the final paper. The reviewers made important recommendations for improving the paper. The authors have made these improvements, as a result I recommend **accepting the paper for publication**. However, I recommend accepting the paper after making the following 3 minor corrections:

1. Reconstruct the abstract so that it is a miniature of the paper: 1-2 synthesized sentences from the introduction; 2-3 sentences summarized from the research hypothesis, purpose and objectives, research methods; 4-5 sentences synthesized from the results, including data.
2. Tables and figures should have all the abbreviations used explained in footnotes.
3. Adding the conclusion chapter as requested by reviewer 2.
