PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--|--|
| Compulsory REVISION comments | <ul style="list-style-type: none"> - It seems that the title of the manuscript should be shortened, since it's too long. - A brief explanation of the study area should have been given by the author from the location and characteristics of the region point of view. - Some key words can be added to the key words section such as: "Eastern Uttar Pradesh". - It seems that more details should be added to the "Material and Methods" and "RESULTS AND DISCUSSION" Sections. - The text should be edited from literal and technical point of view (i.e. the first sentence of the "Conclusion" Section mentioning: "Based on the above finding" as the opening sentence of this section could have been mentioned better such as: "based on the research findings" or similar to this which can be much more accurate) - It seems that the author could have used much more up to date references and documents to enrich the text with much more scientific works. Except a single reference belonging to the year 2021 the rest of the references belong to the year 2014 and before that! - It seems that the author should rearrange the manuscript. | |
