

Review Form 1.6

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_ IJPSS_92875
Title of the Manuscript:	Seed Morphometry and Different Pre-sowing Treatments on Seed Germination Behaviour of Spondias pinnata Linn. under Nursery Condition
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://journaljabb.com/index.php/JABB/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is an interesting study, and the experiments were well done. I recommend to minor revision: (1) Why to study the seed germination rate of Spondias pinnata? In the abstract section the aim should be given. (2) Why to treat the seed with thiourea or KNO ₃ ? In the discussion section, please explain the action mechanism and compare their effect. (3) In the conclusion section, which treatment of thiourea or KNO ₃ can be used? (4) In the abstract and conclusion sections, the highlights should be summed up.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
