Optional/General comments	<ul style="list-style-type: none">- The research contains a good idea that deserves the researching and studying.- Studying the health of the soil and its fertility is one of the necessary requirements before planting, and this is what the researcher tried to emphasize in his research, especially in the case of growing crops sugarcane-ratoon-wheat cropping, especially the lack of nutrients in the soil, for example, available nitrogen, potassium and available zinc, which consequently affect the productivity of the crop for those crops. Appropriate integrated nutrient management practices followed by farmers in order to improve soil health, ultimately improving the economic situation of farmers through increased production and productivity.- The references contain recent references for example Dhaliwal et al.2022, Tiwari et al.2020, Bhople and Sharma 2020.
