PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>I consider it convenient to indicate the intention and the effort that the authors make when wanting to make the manuscript and contribute an experience to a research product, which is certainly valuable and recognized. I think it would be an interesting model to improve and clearly establish originality.</p> <p>The manuscript is interested. However, there are some comments that should be considered before publication, in this way the scientific quality of the manuscript would be improved.</p> <p>I suggest that the authors update the bibliography, many of the citations are more than 15 years old, so I suggest adding recent references that address the topic at hand. Suggested citations are for genuine scientific reasons that emphasize the current topic of study in context.</p> <p>Authors should consider the corrections suggested by the reviewers. In this way the postulated manuscript would be presented reasonably, fluently reading.</p>	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
