PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The article in my opinion is very interesting, but some more information are need ed. 1. In the summary, the associated factors of group B Streptococcus in the vagina of pregnant women are not explained, please explain. 2. Some names of microorganisms need to be italicized, please check carefully. 3. Please provide photos of representative culture dishes, microscope photos and physiological and biochemical evidence to prove that the microorganism is <i>Streptococcus agalactiae</i> . 4. Does the type and duration of antibiotic usage affect the existence of <i>Streptococcus agalactiae</i> ? Please specify. 5. The significance of this study is not very obvious and needs further elaboration.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
