Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	Language needs a lot of improvement. It looks a mere compilation and that too is not drafted in a systematic manner. Objectives for writing the review are not clear. All the content quoted in the review can be found in similar previously done other reviews as mentioned below. Though the objective seems to promote incorporation of chinese traditional medicine as a concurrent treatment for febrile seizures in children; there is not a single supporting reference. Though authors have quoted that the review provides new ideas for the diagnosis and treatment of FS in children; in actual its missing.
