

Editor's Comment:

After going through the paper and its revised version, including the reviewers' comments, the manuscript can be considered. Although the study is quite interesting.

Also, in the title, it would be better to also specify the region and country of the study site

The prevalence of malaria parasites and the dynamics of malaria vectors in Adenta-Barrier in...?

Editor's Details:

Dr. Vachel Gay V. Paller
Associate Professor,
University of the Philippines Los Banos, Philippines.
