Manuscript Number:	Ms_INDJ_91885
Title of the Manuscript:	Are Healthcare Workers on the Frontline Experiencing Psychological Distress & Burnout Syndrome Due to COVID-19 Pandemic?
Type of the Article	Review Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalindj.com/index.php/INDJ/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The paper would be much better if the authors would show all the studies that have had results that showed a correlation between occupational burnout syndrome, mental and psychological distress, and COVID-19. Also, there are letters in operation, and I propose to the authors to read the changes everywhere where there are any errors (e.g. and the abstract section is the word burnout instead of burnout ...). In the target analysis, there is also a section - the authors should explain the database, time frame, the criteria for involving the study (e.g. works that are only in English), that articles are available public, etc.	
Optional/General comments	The paper deserves to be published with the mentioned corrections.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
