

Review Form 1.6

Journal Name:	International Neuropsychiatric Disease Journal
Manuscript Number:	Ms_INDJ_91949
Title of the Manuscript:	Transcranial Magnetic Stimulation: New Sapience into How Brain Stimulation palliates symptoms of PTSD
Type of the Article	Review Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalindj.com/index.php/INDJ/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	I believe that it is an appropriate subject but a greater bibliography should be resorted to, since being a new therapeutic there is not too much casuistry.	
Minor REVISION comments	I advise expanding the article further to bring more certainties than uncertainties, there are many "coulds" and we need evidence-based medicine and if this evidence is little, more trials should be done and not overdo revisions	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
