### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ul style="list-style-type: none"><li>• The standard of English should improve to the level of a high standard article which I have done by providing supportive revision corrections that are highlighted in yellow and should be incorporated if the authors are happy.</li><li>• I have highlighted items in red which must be done including declaration of conflict of interest and source of funding for the research</li><li>• The writing of the references should be consistent and of one style.</li></ul>	
<b>Minor</b> REVISION comments	See above	
<b>Optional/General</b> comments	This was a good research work and if a total of such research articles are published on similar aspects of research work undertaken on diabetic rats, if I was an examiner, I would recommend an award of a doctorate degree with or without face to face defence of the thesis or by Teams Telephone defence of the thesis. The authors should be encouraged to quickly make the suggested minor corrections or editing so that the article can be published quickly.
