

## Review Form 1.6

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_91747
Title of the Manuscript:	Optimization Studies on Extracellular Protease Production by <i>Aspergillus niger</i> and <i>Aspergillus terreus</i> Using Skim Milk Casein as Substrate
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://journaljabb.com/index.php/JABB/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	In this manuscript, the authors investigated the protease production capabilities of <i>Aspergillus Niger</i> and <i>AspergillusTerreus</i> fungi. The manuscript is well-written, and the results are novel. The results clearly show that both fungi produced protease. I have only one minor comment: I think that Figures 1 and 2 should be explained a little more in the manuscript. For instance, what do the authors think about why protease activity for <i>A. Niger</i> is significantly lower than <i>A. Terreus</i> (Fig 1)? Additionally, in Figure 2, why does the protease activity of <i>A. Terreus</i> sharply decrease while the one of <i>A. Niger</i> doesn't? It would be nice to have some discussion on this or perhaps some references.	
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
